

## Health Project: Contraceptives PowerPoint Presentation Lesson Plan

### Project Description:

1. Create an eight-slide PowerPoint and present it. Each slide is worth 10 points and the class presentation is worth 20 points, for a total of 100 points.
2. The general topic is Contraceptives/Birth Control. The method of contraception you will research is \_\_\_\_\_.
3. Search Teen Health & Wellness at [www.teenhealthandwellness.com](http://www.teenhealthandwellness.com) for articles on the method of contraception/birth control assigned to you. Read other relevant Teen Health & Wellness articles on contraception/birth control as needed to supplement your knowledge.

4. Here are the criteria for both the whole project and each individual slide:

Appearance/Layout: The presentation should have a theme and consistent slide layout.

Content: Data for each slide must be presented using the order and guide below.

Accuracy: The information must come from a reliable source, which will be documented in slide 8.

Creativity: Graphic design, animation, and other images should be used, but with restraint.

Visual Aids: You should use relevant pictures, graphs/charts, and other material that gives the viewer a better understanding of your topic.

5. Slide Order:

1. Title, name, date, picture, teacher, grade, and period
2. Classifications: Hormonal, barrier, behavioral, sterilization, or other.  
Identify whether it's prescription or non-prescription.
3. How it works.
4. Where and how it is obtained and its cost.
5. Effectiveness with perfect use and with typical use.
6. Three advantages and three disadvantages.
7. How it compares to abstinence.
8. Bibliography with all Web sites and any other references used for research.
